4th GLOBAL AGRICULTURE SUMMIT AND AWARDS 2019

5 November, 2019 | Hotel Taj Palace | New Delhi

Even after decreased contribution to GDP, agriculture still continues as a major livelihood provider around the globe, especially in the developing world; and hence responsible for economic growth and social transformation. Mammoth work has been done in agriculture in the recent years on the part of the industry, NGOs, CGIAR bodies and institutions, supported by the Government and international organisations to transform the agriculture and allied sectors. The most significant development in the last one decade has been the emergence of large number of start-ups in food and agriculture, across the value chain spectrum, completing the chain from farm to fork. In India, the Government schemes like ACABC, Startup India, Standup India, Skilled India and launch of MUDRA Bank and such other initiatives have accelerated the value creation and entrepreneurship activities in the farm sector and connected the same to the markets and the consumers through innovative agribusiness models.

Connecting farmers effectively with trade, markets and value added activity holds the key to their prosperity. In this context, Government of India has launched eNAM to help in marketing and also the program towards doubling farmers' incomes by 2022. There is need for understanding and adopting successful global models and also fostering farmer-industry-institution partnerships towards helping farmers gradually transforming from farmer to farm entrepreneurs. Doubling agri exports is key to doubling farmers incomes. The thrust of the Government and all key stakeholders has now shifted to connecting farmers to exports market. To grow exports rapidly will require qualitative improvements in production and value chain. The 4th Global Agriculture Summit 2019 aims to provide the platform towards facilitating farmers connect with the technologies, markets, industry, institutions and the Governmental programs towards improving the efficiency and quality of farm production and value addition; and connecting with the domestic and global markets. Indian Chamber of Food and Agriculture seizes the opportunity to discuss the constraints and opportunities for a global momentum towards making Indian agriculture high-tech, value added and global market linked for best returns to farmers and to all stake-holders across the food value chain. This may require collective efforts for increased flow of knowledge, technologies, investments and market access. The governments need to create enabling policy environment for effectively translating the potential of agriculture through agribusinesses, and thus empowering farmers. Towards this end, ICFA is bringing together eminent personalities of Indian and global agriculture, food and agribusiness sectors on one platform on the event of 4th Global Agriculture Summit, which is part of overall AgroWorld 2019.

This spectacle will be combined with the presentation of Global Agriculture Awards 2019. Important individuals and institutions, who played pivotal role in building new faiths and ambitions in agriculture will be acknowledged by the Global Agriculture Awards 2019. On this occasion, ICFA and Agriculture Today will also release the Agriculture Year Book 2019 for an exhaustive appraisal of activities in food and agriculture round the year. It is must for everyone anyhow associated with food and agriculture via business, research, academics, media, farming, trade, development, policy making, implementation and any other medium across the globe to participate in this amalgamation of events.

3. To discuss the policy, trade, technology, and market perspectives to agriculture on national and global level for sustainable development and towards creating opportunities for farmers.
4. To discuss the role of the States, industry and institutions towards promoting FPOs, agribusinesses, start-up ventures and value chain development to help farmers with marketing and technologies.
5. To discuss the issue of climate change and food security, and the need for collective action through global partnerships and the increased role of private sector in providing farmers marketing, trade and technology access to double farmers' incomes.

AGRICULTURE YEAR BOOK 2019

ICFA & Agriculture Today announces the launch of its 12th edition of the Agriculture Year Book 2019 on 5th November at the Global Agriculture Summit in New Delhi. The Agriculture Year Book 2019 is an initiative to provide our readers with a credible documentation of the year's achievements and an in-depth profile of the emerging agricultural scenario. The Agriculture Year Book 2019 will have a wide coverage of topics related areas like global developments, policy issues, technological breakthroughs, business and market dynamics, trade and industry issues and challenges in farm and agribusiness sector, future outlook etc.

GLOBAL AGRICULTURE AWARDS 2019

Food and Agriculture sector is undergoing a rapid transformation in India and globally. The role of various stake-holders in driving the growth and value added transformation of farm sector is commendable. The institution of the Global Agriculture Awards in 2016 was a significant step in this direction to recognize the contributions of various stake-holders in agriculture. The Awards are given annually in different categories to those individuals and organizations, who have made outstanding contributions in their respective fields. The National Awards Committee is headed by the world renowned agriculture scientist, Prof. MS Swaminathan, with twenty six persons of national eminence as its members. The Agriculture Awards shall be presented on 5th November, 2019 in New Delhi.
